UCOP Campus Update December 2013

2012 CUCSA Staff Engagement Survey

We hosted brown bags for each of the staff engagement work groups. We had a little over 200 participants attend the events. The groups presented draft recommendations and their approach to each of their topics. The groups discussed performance management, career development, and communications. The overall feedback from staff to the work groups is that teams are on the right track and have developed sound approaches to their topics. The feedback from the groups (to us) is that they're excited about their work and appreciate working on a cross departmental work group. The teams will present their recommendations to OP's Climate Council on November 18th and to President Napolitano and EVP Brostrom on December 19th.

OPSA Events and Activities

We co-sponsored President Napolitano's first town hall meeting with staff. The event went really well. She extended staff an invitation for continued dialogue with her office. OPSA will be supporting whatever shape these efforts take. The opportunity to support these communication efforts are in line with the Staff Engagement Initiative.

We also supported Staff Appreciation Week which happened September 30th through October 4th. The event was well received and the talent show seems to be a great community builder across our decentralized offices and with senior executives which participated in this year's show.

This quarter we also delivered our UC Admissions and Financial Aid brown bags and had our first presentation regarding long term care. The admissions and financial aid brown bags were (as usual) well received. The brown bag on long term care was also well received and additional brown bags are forth coming.

Last but not least, we co-sponsored two benefits town halls with our local Human Resources on October 7th. We had approximately 250 employees attend.
