

## **Campus Update March, 2007**

### **Promoting the Vision**

Delegates Liz Moxon and Jeff Troutman have been visiting various Employee Activities Association groups to both promote CUCSA and encourage applying for the delegate position. They've also canvassed the Advanced Light Source administrative staff in this effort as well.

### **Promoting the Individual**

Bill Johansen was featured in the most recent issue of Berkeley Lab's *The View* newspaper. This article described Bill's history at the Lab, but about 75% of it was devoted to his involvement with CUCSA. It spoke to the issues that the workgroups are focused on in addition to the recently achieved goal of having a Staff Advisor to the Regents at the table. The article closed with the call for nominations that is currently underway with note of the current Senior and Junior delegates.

### **LBNL Workplace Climate Survey Results**

On June 8, 2006, LBNL's Office of Workforce Diversity initiated its first Workplace Climate Survey and the results have just been released. The survey was completed by more than 35% of the lab workforce. The overall result is that the staff is generally satisfied to very satisfied with the workplace climate at LBNL.
